## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1- 8, 12-16, 20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen (US Patent 5123,908). The patent to Chen discloses a connector for joining hollow anatomical structures together with each of the limitations recited. The union of the vessels in Chen is inherently fluid proof. The frictional fit between the connector prevents axial displacement of the annular body. Chen further teaches that the device may be coated to control time of dissolution.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 21 & 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The examiner is not clear how the “ingrowth” step is performed.

### ***Allowable Subject Matter***

Claims 9-11, 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
